

(
a
a program adapted to be run on said server to provide access to the contract account file on the server to the insured through a communications network to renew the insurance contract; upon accessing said contract account file by the insured, said program directing said server to display to the user through the communications network at least one question to determine if a change has occurred with respect to said insured risk which would affect terms of said contract; said program prompting said user to provide an answer to said at least one question; upon receipt of an answer to said at least one question indicating no change which would affect the terms of the insurance contract, said program directing said server to generate renewal terms for renewal of the insurance contract and displaying said renewal terms to said user through the communications network; and said program prompting the insured to accept the renewal terms through said server.

11. The computer system as in Claim 10 wherein upon receipt of acceptance of the renewal terms by the insured through the server, said program directing said server to generate a

confirmation message regarding renewal of said contract which is viewable by the insured through the communications network.

12. The computer system as in Claim 10 wherein upon receipt of an answer to said at least one question indicating a change to the insured risk which would affect terms of said contract, said program directing said server to provide through the communications network means to enable entry of explanatory information by the insured regarding the change.

13. A method for renewing by an insured an insurance contract from an insurer and for an insured risk through a computer system having data associated with the insurance contract stored in a contract account file on a system server, the method comprising the steps of:
electronically accessing the contract account file on the system server through a website;
submitting to said system server through said website an answer to at least one question generated by the system server; said at least one question designed to determine if a change has occurred with respect to the insured risk which would affect terms of the contract;

upon submitting an answer to said at least one question which indicates no change which would affect terms of the insurance contract, providing means for receiving from the system server through the website renewal terms for renewal of said contract; and electronically accepting said renewal terms through said website.

14. The method as in Claim 13 further including the step of: upon submitting an answer to said at least one question which indicates a change which would affect terms of said contract, electronically conveying explanatory information to the insurer.
15. The method as in Claim 13 further including the step of: selecting the insurance contract to be renewed from a listing of a plurality of contracts between the insured and the insurer which is accessible through the website.
